Youssef Hussien Said

Flutter Developer

Cairo, Egypt | (+20) 01156378215 | Youssefhussien211@gmail.com | LinkedIn | GitHub | MS: Exempted

Profile

I am a Software Engineer with a bachelor's degree in Computer Science and Artificial Intelligence. I have a strong passion for mobile application development, particularly using Flutter, with 2 years of hands-on experience in the framework. I am seeking opportunities as a Software Developer with an expert team of developers who can help advance my career toward senior positions in the future.

Experience

Information technology consultation and research | Flutter Developer **July 2023 - Aug 2023**

Benha University, EGY

Completed a comprehensive training program in Flutter development at Benha University, emphasizing the creation of cross platform mobile applications and equipping me with skills in UI/UX design, state management, and API integration through hands-on projects, which also enabled me to combine technical expertise with analytical abilities, effectively preparing me to tackle real-world challenges in the tech industry.

Cellula Technology | Flutter Developer Intern: September 2024 - November 2024

- **Training Completion and Skills Development**: I completed my training as a Flutter developer, where I gained hands-on experience in building cross-platform mobile applications using Dart and the Flutter framework.
- **AI-Integrated Projects:** As part of my training, I developed two projects that integrated artificial intelligence, enhancing functionality and user experience through features such as Gemini Ai & Machine learning model
- **Enhanced Technical Proficiency:** This experience not only strengthened my Flutter development skills but also equipped me with the ability to merge cutting-edge technology with mobile app solutions.

BoodSolutions | Flutter Developer: Jan 2025 – May 2025

- **Cross-Platform Development**: I develop high-performance mobile applications for Android and iOS using Flutter, ensuring seamless user experiences.

- **Collaborative Innovation**: I work closely with UI/UX designers and backend developers to optimize application design and performance, contributing to team discussions and code reviews.

Cellula Technology | Flutter Developer Monitor: Jul 2025 – Dec 2025

- Conducted structured code reviews for 20+ trainees, improving code quality and adherence to Clean Architecture principles.
- Provided detailed technical feedback reports and guided trainees in applying best practices in state management and architecture.
- Monitored weekly task progress following Agile methodology.
- Evaluated trainee performance and identified top-performing developers for certification.
- Mentored junior developers in debugging, API integration, and scalable app structuring.

Cyparta | Flutter Developer: Aug 2025 - Now

- **Cross-Platform Development**: I develop high-performance mobile applications for Android and iOS using Flutter, ensuring seamless user experiences.

- **Collaborative Innovation**: I work closely with UI/UX designers and backend developers to optimize application design and performance, contributing to team discussions and code reviews.

Education

Benha University Aug 2020- Jun 2024

Bachelor, Computer Science and Artificial Intelligence

Amit Learning Jun 2023 - Oct 2023

Diploma, mobile application development using flutter (92%) Maadi , Egypt

Projects

Find me | LinkedIn

It's my graduation project, for which I received an excellent grade (A+). Additionally, it was chosen as one of the best 25 projects in my college.

- Recognize Injured People app with two applications for users and admin control to enhance emergency responses.
- Delivered solutions to ministries like Health, Police, and Social Solidarity for effective emergency management.
- Addressed the critical challenge of timely identification of injured individuals during emergencies to facilitate rapid assistance.
- Created a Flutter-based app using AI facial recognition to accurately match injured individuals with their family members.

HB App |

- A patient-focused app for a cosmetic surgery clinic operating in **Kuwait**, allowing users to book and track appointments and follow their treatment progress seamlessly.
- Includes a loyalty system where patients earn points based on engagement and activities, which can be redeemed as cashback to enhance patient retention and satisfaction.
- Provides clinic updates, educational videos, and informative articles aimed at improving patient awareness and engagement with cosmetic and aesthetic treatments.

Safarni |

- **Developed "Safarni" mobile app for discovering nearby hotels and بسهولة requesting flight bookings through a simple user interface**
- **Implemented location-based hotel browsing with detailed hotel information display**
- **Achieved 100+ downloads, delivering an all-in-one solution for accommodation search and flight booking requests**

Mohadraty-D |

- A university app designed for doctors to manage and track their lectures, schedules, and assigned sections.
- Enables instructors to monitor student attendance for each lecture and section.
- Allows doctors to search for enrolled students, view student profiles, and check the number of lectures attended.

Fastlink Vendor |

- A vendor-focused app operating in **Nigeria** and **Kenya**, allowing sellers to add and manage products, categories, and warehouse stock efficiently.
- Enables vendors to track orders with multiple statuses (in progress, pending, completed, etc.) and create special offers to boost sales and customer engagement.
- Provides financial tracking with visual charts for earnings and order statistics, along with functionality to withdraw vendor balances securely.

Scholify |

- An e-learning app that displays courses across multiple specialties, allowing students to browse and purchase any course.
- Each course is divided into lectures, with each lecture containing its own content such as videos, files, quizzes, and a dedicated discussion section.
- Includes a favorites page, profile and language settings, and notifications for newly added courses or purchase approval updates.

Scholify – QR |

- A QR-based learning app that allows students to scan an instructor's QR code to fetch and display all courses offered by that instructor.
- Students can purchase courses directly through the app after scanning the QR code.
- After purchase, students can access the course content, which is divided into lectures, each including videos, files, quizzes, and discussion sections.

Fe-khedmatek Sannie |

- A service app that allows users to request any craftsman (technician) based on their needed service.
- Displays nearby craftsmen using location-based search to help users find the closest available providers
- Provides an easy and fast way to connect users with trusted craftsmen through a simple user-friendly interface.

Almaoulaoui |

- Developed a celebration booking platform operating in **Syria**, enabling users to seamlessly reserve halls, DJs, lighting, photographers, and complete music teams through a unified application.
- Supports event planning for various occasions, including weddings, birthdays, corporate events, and other celebrations, providing a comprehensive marketplace for event services.
- Offers a simple and efficient booking experience where users can browse service options, compare providers, and confirm reservations in just a few steps for maximum convenience and reliability.

Skills

Technical Skills:

- Dart
- Flutter
- HTTP
- Firebase Storage
- State Management
- Firebase Database
- MVC
- MVVM
- Restful API
- Dio
- OOP
- Local database
- Authentication
- Realtime Database
- Clean Architecture
- GitHub
- MySQL
- Google map
- Cubit
- Local Notification
- Python
- Solid Principles
- Dependency Injection

Soft Skills:

- leadership
- Presentation Skills
- Team working
- Analytical Skills
- communication skills
- Time Management
- Problem Solving

Language

- Arabic (Native)
- English (Very Good)
